GMP 1 - Pharmaceutical industrial production

Denmark's most important business area in Denmark's best education facilities that comply with the Good Manufacturing Practice (GMP) standards of the pharmaceutical industry. You will be able to ensure quality in production of pharmaceutical and biotechnological industry.
You will be able to participate in pharmaceutical industrial production in compliance with current GMP rules. Under guidance, you learn how to handle raw materials, packaging materials, and finished products correctly.

You are introduced to gowning procedures as well as to processes for carrying out cleaning and disinfection based on knowledge of microbiology. Under guidance, you will be able to fill in relevant documentation.

Course content
Industry and Product Information

- The pharmaceutical industry
- Pharmaceutical products
- Introduction to Pharmaceutical Production

Production Hygiene

- Microbiology, cleaning and disinfection control
- Procedures for Gowning and Behaviour in classified areas
- Production of ointment in class D

Quality Assurance

- GMP regulations
- Documentation and good documentation practice.
- Quality Control

Target group
The course is a beginner's course for new hires and future employees in the pharmaceutical industry.

Certificate of education
After passing the multiple choice test on the last day of the course, an AMU certificate will be issued to you.

Kursuspris

Inden for AMUs målgruppe:
DKK 1.090,00

Uden for AMUs målgruppe:
DKK 4.995,75
